Roads

Fort Myers News-Press: From the reasons he gave for turning down the proposed \$48,000,000 PWA road expenditure it appears that Governor Cone has gone no deeper than an exceedingly superficial horseback opinion to rule out the carefully studied recommendations of much better authorities.

The proposition was to obtain \$48,000,000 from the PWA, some \$21,600,000 of it as a grant and the rest, counting interest, to be wiped out by 10 yearly payments of \$3,000,000 from

the State Road Department's present annual income of nearly \$10,000,000.

The whole thing is simple enough for ordinary common sense to understand—and approve. The state needs \$48,000,000 worth of roads. The question is whether we get half of them in 10 years by saving up \$3,000,000 a year and then spending it, or get all of them now and then pay out the \$3,000,000 as we save it up. The hard headed business man who was on the stump seeking votes in the campaign two years ago would see that at a glance. What's happened up there—is somebody else being Governor?

Running For Practice.—A Republican named Leap is running for Congress in Virginia, overlooking the fact that it won't be Leap year till 1940.—St. Petersburg Independent.

Weak Minded Campers.—Governor Cone said not long ago that he could do nothing to stop a German bund camp in this state. We want to see a law added to the books whereby no such camps can be established anywhere in this country. Such camps will probably prove dangerous to America in future years.—Wau-chula Advocate.
